The Pontiac Solstice Book traces this remarkable new roadster from beginning to end - conception through development and on into production. This panoramic, oversized (9x12 inches) hardcover books eight chapters, 130 pages and 192 color pictures highlight the GM designers, engineers and managers who transformed Bob Lutz's idea into reality in a record 27 months. The book goes into extensive detail about the turbocharged GXP, V8 conversions, the Solstice as race car, manufacturing processes and what's available in the way of accessories and options. The book's author is engineer/racer/writer Gary Witzenburg. Bob Lutz, GM's global vice chairman, contributed the foreword. If ever you've lusted after a true American sports car and one of Detroit's greater performance bargains, the Solstice is it. Here's a car that's a pleasure to look at and a kick to drive. Read all about it in The Pontiac Solstice Book.

"Beyond the Horizons: The Lockheed Story is the story of those turbulent eighty-two years during which Lockheed achieved fantastic successes and endured occasional failures. Lockheed aircraft set innumerable records and were flown by great pioneering aviators such as Amelia Earhart, Wiley Post, and Howard Hughes. Lockheed engineers achieved fame usually reserved for film stars: Men like the great Kelly Johnson and Ben Rich advanced the world of aviation with their genius, and were honored as legends in their own time. Yet the secret of Lockheed lies in the spirit of family that illuminated the corporation over the years and permitted it to gain great triumphs and survive great tragedies. Over eight decades, Lockheed's unique corporate culture has enabled the company to thrive despite fierce competition. Making the right choices in leadership and technology at the right time contributed to their success, and here is the inside story of the people responsible for transforming Lockheed into the most profitable, prestigious, and influential company in the aerospace industry." --

Hydrogen Fuel Cells for Road Vehicles addresses the main issues related to the application of hydrogen fuel cell technology in the road transportation sector. A preliminary treatment is given on fuel resources and atmospheric pollution concerns which are closely related to the current technology (internal combustion engine) used for moving people and goods. The authors deal, in particular, with the problems that can hinder a widespread hydrogen market (production, storage and distribution), as well as giving an analysis of fuel cell technologies available for utilization of this energy carrier in the automotive field. Hydrogen Fuel Cells for Road Vehicles also examines the concerns faced during the design and realization of a PEM fuel cell system with optimal size and efficiency, evidencing the impact of the individual auxiliary components on energy losses and dynamic stack performance. The book ends with the analysis of two practical case studies on fuel cell propulsion systems. Hydrogen Fuel Cells for Road Vehicles is a useful text for researchers, professionals and advanced students in the fields of automotive and environmental engineering.

This first book of its kind tells the behind-the-scenes story of the incredibly illegal Cannonball rally. This best seller is now available in paperback! In the early 1970s, Brock Yates, senior editor of Car and Driver Magazine, created the now infamous Cannonball Sea-to-Shining-Sea Memorial Trophy Dash; a flat out, no-holds-barred race from New York City to Redondo Beach, California. Setting out to prove that

well trained drivers could safely navigate the American highways at speeds in excess of the posted limits, Mr. Yates created a spectacle reminiscent of the glory days of the barnstorming pilots. Filled with fascinating unpublished stories, nostalgic and modern-day photographs, inside information and hilarious stories from this outrageous and incredibly immoral rally. Brock is one of the best-known, most respected automotive journalists in the world today.

This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.
