Written at a practical level, suited to the business audience, this exceptional book explores the business environment of making GIS successful. It applies academic rigor to practical and commercial implementation issues and offers viewpoints from all parties involved in GIS implementation. Achieving Business Success with GIS provides tangible advice ranging from technical and financial to organizational and commercial. It is unique in that it does not stop short of providing, without hype or embellishment, practical advice and real examples regarding the total cost of ownership of a project or finance and return investment of GIS products. Achieving Business Success with GIS highlights that the use of GIS technology needs to be focused on the business issues, not the technology. The book begins by describing the use of GIS in a global context within a business environment as the background to outlining the need for organizations to have a strategy for their GIS. The book then goes on to explore the elements of a GIS strategy and explains issues which are relevant for such approaches and how to go about developing it. In the closing chapters of this book, the process of specifying and tendering for a GIS are discussed to ensure that the focus of the reader remains on the business issues of the organization. This is followed by examples of the best and worst Geographic Information Systems including a discussion on Google Earth and Web 2.0. The combination of the statistics from the GIS / Spatial surveys and the author's consulting experiences make this book an invaluable resource for GIS managers in government (federal, state and local) and utilities, organisations using GIS, and students and lecturers in this field.

"A brutal conflict in Mali and an international race for rare elements sets the stage for Troy Pearce and his drone technology to rescue an old friend in this adrenaline-fueled series. Blue Warrior is set in the remote Sahara Desert, where a recently discovered deposit of strategically indispensable Rare Earth Elements (REEs) ignites an international rush to secure them. Standing in the way are the Tuaregs, the fierce tribe of warrior nomads of the desert wasteland, who are fighting for their independence. The Chinese offer to help the Malian government crush the rebellion by the Tuaregs in order to gain a foothold in the area, and Al-Qaeda jihadis join the fight. In the midst of all this chaos are Troy Pearce's closest friend and a mysterious woman from his past who ask him for help. Deploying his team and his newest drones to rescue his friends and save the rebellion, Troy finds that he might need more than technology to survive the battle and root out the real puppet masters behind the Tuareg genocide"--

Addressing the methodological and topical challenges facing demographers working in remote regions, this book compares and contrasts the research, methods and models, and policy applications from peripheral regions in developed nations. With the emphasis on human populations as dynamic, adaptive, evolving systems, it explores how populations respond in different ways to changing environmental, cultural and economic conditions and how effectively they manage these change processes. Theoretical understandings and policy issues arising from demographic modelling are tackled including: competition for skilled workers; urbanisation and ruralisation; population ageing; the impacts of climate change; the life outcomes of Indigenous peoples; globalisation and international migration. Based on a strong theoretical framework around issues of heterogeneity, generational change, temporariness and the relative strength of internal and external ties, Demography at the Edge provides a common set of approaches and issues that benefit both researchers and practitioners.

Denying terrorists sanctuary has become a pillar of U.S. defense strategy since the September 11, 2001 (9/11) attacks. Violent extremist organizations in North Africa, such as the group al-Qaeda in the Islamic Maghreb (AQIM), have used remote and sparsely populated areas in the Sahara for protection from security forces to conduct a range of terrorist activities, such as training, planning, and logistics.<sup>1</sup> Despite the time elapsed since the 9/11 attacks, and the resources dedicated to denying sanctuary globally, the concept of sanctuary remains largely unexplored and poorly understood. This monograph proposes a functional understanding of sanctuary and offers fresh ideas to deny it using a detailed case study of the most notorious of these North African terrorists, Mokhtar Belmokhtar, from his arrival in Mali in the late 1990s, until the French intervention in early 2013. Follows a restaurant critic probing the larger issues behind the globalization of eating out, in a culinary study of topics ranging from the commercialization of culinary artisans to the consequences of esoteric menus.

This volume presents national reports describing the legal instruments that are available to prevent the payment of bribes for acquiring contracts. Anti-corruption is one of the preeminent issues in the modern global commercial order and is tackled with the help of criminal law and contract law in different ways in different countries. The reports included in this volume, from very diverse parts of the world, represent a unique and rich compilation of court decisions, doctrinal discussions and a pool of suggested solutions. The central theme is the enforceability of three problematic types of contracts: the bribe agreement, whereby a bribe payer promises the agent of his business partner a personal benefit in exchange for favourable contract terms; the agreement between a bribe payer and an intermediary (a "bribe merchant"), where the latter offers his expertise to help funnel bribes to agents of the business partner; and finally, the contract between the bribe payer and his business partner which was obtained by means of bribery. The analysis is tailored toward commercial contracts, which can also include contracts with state-owned enterprises. The examination and comparison of international and national initiatives included in this volume advance the

discussion on the most appropriate remedies in corruption cases, and show how to get past the boundaries of criminal, private and contract law.
