In these tumultuous times of economic and technological change, staying ahead depends on continual self-education—a lifelong mastery of fresh ideas, subjects, and skills. If you want to accomplish more and stand apart from everyone else, you need to become an ultralearner. The challenge of learning new skills is that you think you already know how best to learn, as you did as a student, so you rerun old routines and old ways of solving problems. To counter that, Ultralearning offers powerful strategies to break you out of those mental ruts and introduces new training methods to help you push through to higher levels of retention. Scott H. Young incorporates the latest research about the most effective learning methods and the stories of other ultralearners like himself—among them Benjamin Franklin, chess grandmaster Judit Polgár, and Nobel laureate physicist Richard Feynman,

as well as a host of others, such as little-known modern polymath Nigel Richards, who won the French World Scrabble Championship—without knowing French. Young documents the methods he and others have used to acquire knowledge and shows that, far from being an obscure skill limited to aggressive autodidacts, ultralearning is a powerful tool anyone can use to improve their career, studies, and life. Ultralearning explores this fascinating subculture, shares a proven framework for a successful ultralearning project, and offers insights into how you can organize and execute a plan to learn anything deeply and quickly, without teachers or budget-busting tuition costs. Do you want to know how to beat your opponent from ANY position on the board? Do you want to learn how to anticipate his every single move? Would you like to know EXACTLY what you need to do to SKYROCKET your rating in half the time? If your answer is yes, then read on! Hi, my name is Bobby Silman, and I have been helping people improve their chess skills for the past 11 years. I remember when I first started playing chess, there were times when I played like crap. I would lose several games in a row and see my score drop quickly. Have you ever had something like that happen to you? If yes, then you know exactly how it feels! When you lose, it's as if your opponent has some sort of mental superiority over you, which causes you frustration, almost to the point of not letting you sleep at night! At this point, you may be asking yourself, how do I improve my skills? This is exactly what I was wondering as well. So, I used the feeling of hatred that I had experienced when I was defeated to gain more knowledge of the game and increase my skills. I spent thousands of hours perfecting my game, but today things have changed dramatically! After years of teaching, I can tell you with certainty that the best and fastest way to increase your skills is to follow a well-structured curriculum step by step. That's why I decided to summarize all my experience in this guide containing the same information for which I am paid handsomely by my students. Are you curious about what this is all about? What is really important in chess is to understand the reason behind each move. I mean, you need to know what the result of the opening you are playing is and not just memorize it. This is because things may not go as you planned, and therefore you need to be
