Includes 30 Illustrations In this expert survey Air Force Historian Robert Miller explores the Epic story of the Berlin Airlift, the confrontation of Democracy and Communism as the world teetered on the brink of the Third World War. The Berlin blockade (24 June 1948;–12 May 1949) was one of the first major international crises of the Cold War. During the multinational occupation of post–World War II Germany, the Soviet Union blocked the Western Allies' railway, road, and canal access to the sectors of Berlin under allied control. The Soviets offered to drop the blockade if the Western Allies withdrew the newly introduced Deutschmark from West Berlin. In response, the Western Allies organised the Berlin airlift to carry supplies to the people in West Berlin. Aircrews from the United States Air Force, the British Royal Air Force, the Royal Canadian Air Force, the Royal Australian Air Force, the Royal New Zealand Air Force, and the South African Air Force flew over 200,000 flights in one year, providing up to 8,893 tons of necessities daily, such as fuel and food, to the Berliners. Neither side wanted a war; the Soviets did not disrupt the airlift. By the spring of 1949 the airlift was clearly succeeding, and by April it was delivering more cargo than had previously been transported into the city by rail. On 11 May 1949, the USSR lifted the blockade of West Berlin. The Berlin Crisis of 1948–1949 served to highlight competing ideological and economic visions for post-war Europe, particularly Germany. The clash ultimately led to the division of that country into East and West and to the division of Berlin itself.

special interests. This collection appeared in 1991 and it holds up very well. Some people swear that this is one of the best collections ever printed by the Mises Institute. At \$5 for a book of nearly 400 pages, this is a wonderful deal, an excellent introduction to the Mises Institute way of understanding the world. Its not wonder that Roy Childs wrote of this book: "The great virtue of the volume is the excellent interaction between first principles and current events.... rational, zippy, to the point, informative with facts and figures, and based soundly on the first principles of liberty and the free market.... you can take your time reading them, using them as a bed book that you can dip into at will, and learn a lot of information in a short time. And the book sizzles." Contributors include Murray Rothbard, Walter Block, David Gordon, Robert Higgs, and Tom Bethell.

This is a beautifully written and engaging book. At its heart is a series of structured interviews with ten Nobel Memorial Laureates in Economics that provide fascinating insights into the main influences on their career paths and pioneering work. Karen Horn is to be applauded, not just for her wide-ranging

scholarship and thought-provoking analysis but also for producing a non-technical yet rigorous book which is eminently accessible to non-specialists. In short this an excellent volume which comes highly recommended. Howard R. Vane, Liverpool John Moores University, UK Karen Horn s questions are insightful, her notes are accurate and informative, and her summing up of the central question of creativity that she poses in the book is cogent and to the point. All in all, this book is difficult to put down and I can t imagine any reader who will not fail to learn a great deal about economics along the way. Mark Blaug, University of London and University of Buckingham, UK Karen Horn s remarkable interviews with ten Nobel Laureates explore the conditions required for scientific progress by navigating the roads to wisdom in economic science. How does progress in economic theory come about? Where do path-breaking ideas come from? What is it that has enabled these outstanding scholars to make their substantial contributions? How deep are the footprints of a particular historical situation, how strong the political tide or the state-of-the-art in economics, and how influential is personal history on their individual roads to wisdom? Analytical answers to these fundamental questions are presented in this insightful collection of deep and highly inspiring conversations with Nobel Laureates Paul A. Samuelson, Kenneth J. Arrow, James M. Buchanan, Robert

M. Solow, Gary S. Becker, Douglass C. North, Reinhard Selten, George A. Akerlof, Vernon L. Smith and Edmund S. Phelps. Superbly supplemented with concise overviews of the Nobel Laureates lives and works, these fascinating discussions culminate with a comprehensive inquiry into progress in economic theory. As such, this eloquent and highly accessible book will prove to be a compelling read for scholars and students of the discipline, and all those with an interest in economics and the history of economic thought.

A SUNDAY TIMES BOOK OF THE YEAR A crucial new guide to one of the most important and most dangerous phenomena of our time: the rise of populism in the West Across the West, there is a rising tide of people who feel excluded, alienated from mainstream politics, and increasingly hostile towards minorities, immigrants and neo-liberal economics. Many of these voters are turning to national populist movements, which pose the most serious threat to the Western liberal democratic system, and its values, since the Second World War. From the United States to France, Austria to the UK, the national populist challenge to mainstream politics is all around us. But what is behind this exclusionary turn? Who supports these movements and why? What does their rise tell us about the health of liberal democratic politics in the West? And what, if anything, should we do to respond to these challenges? Written by two of the foremost experts on fascism and the rise of the populist right, National Populism is a lucid and deeply-researched guide to the radical transformations of today's political landscape, revealing why liberal democracies across the West are being challenged-and what those who support them can do to help stem the tide.

It has, improbably, been called uncommonly lucid, even riveting by The New York Times, and it was a finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute description of the

events of the morning of 9/11 inside the Twin Towers. It is The 9/11 Commission Report, which was, before its publication, perhaps one of the most anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States—which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean—it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts—it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7—it is nevertheless an essential record of one of the most transformational events of modern times.
