This convenient, money-saving package is a must-have for students training for a career in nursing. It includes Murray's Foundations of Maternal-Newborn Nursing, 4th edition text and Mosby's Maternal-Newborn & Women's Health Nursing Video Skills.

This highly respected book helps students develop the technical skills and broad understanding vital for effective practice while ensuring they never lose sight of the importance of compassion in their role as nurses. Presenting maternal-newborn and child health care not as two separate disciplines but as a continuum of knowledge, Maternal and Child Health Nursing, Seventh Edition views the experience of wellness and illness as family-centered events and pregnancy and childbirth as periods of wellness in a woman's life. Consistently linking theory with application to bring clinical concepts to life and using a nursing process framework to help students prepare for effective practice, this Seventh Edition adds new chapter-ending case studies, an expanded focus on culture and families, the latest QSEN content, and more. In addition, this edition is supported by PrepU's adaptive quizzing, DocuCare's educational electronic health record software, and a fully updated Study Guide. Corresponding chapter-by-chapter to Foundations of Maternal-Newborn and Women's Health Nursing, 6th Edition, Elsevier Adaptive Learning combines the power of brain science with sophisticated, patented Cerego algorithms to help you learn faster and remember longer. It's fun; it's engaging; and it's constantly tracking your performance and adapting to deliver content precisely when it's needed to ensure core information is transformed into lasting knowledge. An individual study schedule reduces cognitive workload and helps you become a more effective learner by automatically guiding the learning and review process. The mobile app offers a seamless learning experience between your smartphone and the web with your memory profile maintained and managed in the cloud. UNIQUE! Your memory strength is profiled at the course, chapter, and item level to identify personal learning and forgetting patterns. UNIQUE! Material is re-presented just before you would naturally forget it to counteract memory decay. A personalized learning pathway is established based on your learning profile, memory map, and time required to demonstrate information mastery. The comprehensive student dashboard allows you to view your personal learning progress.

The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.

Foundations of Maternal-Newborn and Women's Health Nursing Saunders

An essential manual encompassing the entire childbearing process, from preconception planning through pregnancy, birth, and the postpartum period. Content progresses from normal to at-risk information within each phase: pregnancy, labor and birth, care of the newborn, and the postpartum period. Cultural aspects of childbearing and material on the childbearing adolescent are integrated appropriately throughout. Every page has been updated to reflect the most current research and technology. The underlying philosophy of the text, however, remains unchanged: pregnancy and birth are normal life processes; members of the family are co-participants in care; and the nursing process provides the nursing diagnoses. Each of the learning aids reflected in this new edition has been grounded in that philosophy and commitment to a family-centered approach.

One of the most complete nursing education learning systems available, Virtual Clinical Excursions guides you through a virtual hospital setting where the patients are real and their conditions are constantly changing. By immersing yourself in a realistic, yet safe, nursing environment, VCE allows you to get acclimated to the routine and rigors of the average clinical rotation where you can conduct a complete assessment of a patient and set priorities for care, collect data, analyze and interpret data, prepare and administer medications, and reach conclusions about complex problems. Each lesson has a textbook reading assignment and activities based on "visiting" the patients in the hospital, which provide a perfect environment in which you may "practice" what you are learning. The main aim of this practical Handbook is to strengthen counselling and communication skills of skilled attendants (SAs) and other health providers, helping them to effectively discuss with women, families and communities the key issues surrounding pregnancy, childbirth, postpartum, postnatal and post-abortion care. The MNH Counselling Handbook is chiefly designed to be used by

groups of SAs with the help of a facilitator. It can also be used by individual SAs who can get together with colleagues for discussions and activities where needed. It relies on a self-directed learning approach, allowing SAs to work at their own pace, drawing on their past counselling experience. The way it is used will be determined by each country's context, and the SAs preference. The MNH Counselling Handbook is divided into three main sections. Part 1 is an introduction which describes the aims and objectives and the general layout of the Handbook. Part 2 describes the counselling process and outlines the six key steps to effective counselling. It explores the counselling context and factors that influence this context including the socio-economic, gender, and cultural environment. A series of guiding principles is introduced and specific counselling skills are outlined. Part 3 focuses on different maternal and newborn health topics, including general care in the home during pregnancy; birth and emergency planning; danger signs in pregnancy; post-abortion care; support during labour; postnatal care of the mother and newborn; family planning counselling; breastfeeding; women with HIV/AIDS; death and bereavement; women and violence; linking with the community. Each Session contains specific aims and objectives, clearly outlining the skills that will be developed and corresponding learning outcomes. Practical activities have been designed to encourage reflection, provoke discussions, build skills and ensure the local relevance of information. There is a review at the end of each session to ensure the SAs have understood the key points before they progress to subsequent sessions.

Canadian Maternity and Pediatric Nursing prepares your students for safe and effective maternity and pediatric nursing practice. The content provides the student with essential information to care for women and their families, to assist them to make the right choices safely, intelligently, and with confidence.
