In recent decades, the woman suffrage movement has taken on new significance for women's history. Ellen Carol DuBois has been a central figure in spurring renewed interest in woman suffrage and in realigning the debates which surround it. This volume gathers DuBois' most influential articles on woman suffrage and includes two new essays. The collection traces the trajectory of the suffrage story against the backdrop of changing attitudes to politics, citizenship and gender, and the resultant tensions over such issues as slavery and abolitionism, sexuality and religion, and class and politics. Connecting the essays is DuBois' belief in the continuing importance of political and reform movements as an object of historical inquiry and a force in shaping gender. The book, which includes a highly original reconceptualization of women's rights from Mary Wollstonecraft to contemporary abortion and gay rights activists and a historiographical overview of suffrage scholarship, provides an excellent overview of the movement, including international as well as U.S. suffragism, in the context of women's broader concerns for social and political justice.

In a new book that has important implications for our vision of the female past, Suzanne Lebsack examines the question, Did the position of women in America deteriorate or improve in the first half of the nineteenth century? Winner of the Bancroft Prize for 1985.

In his inaugural address, Governor Brereton C. Jones proclaimed, "This administration is committed to having the most positive, progressive, exciting four years in our state's history." Through speeches and press releases, this volume reflects the principal concerns of Jones's time in office. Thematically organized, the more than two hundred public statements included here present the public face of the Jones administration on such issues as health care, education, economic development, the environment, and governmental reform. Nowhere else has the full text of these speeches and press releases been printed. Governor Jones, born in 1939, was elected to the West Virginia legislature in 1964, where he served for four years before retiring from politics. After moving to Kentucky and switching allegiance from the Republican to the Democratic Party, he re-entered politics with a successful campaign to become lieutenant governor in 1987. He was elected the Commonwealth's fifty-fourth governor in 1991 by a record margin of nearly two to one. Jones initiated a number of reforms once in office. He turned a \$400 million budget deficit into a \$300 million surplus in four years, and he passed dramatic ethics reform in both the executive and legislative branches. Health-care issues were also of great importance to Jones, who spent the years before his election working with the Kentucky Health Care Access Foundation in addition to farming. After surviving a helicopter crash in 1992, he turned the main focus of his administration toward health-care reform and initiatives. Though he met with legislative opposition when he proposed universal health care for all Kentuckians, he did help pass legislation in 1994 that would serve as a solid beginning on the issue for future governors.

In high school, everyone's talking about college. What to do. Where to go. Why it's important. Classes are given on it. Books are written about it. But details get left out. Every year, college graduates learn this the hard way as they step into adulthood. I was one of them. After earning a four-year degree, I went through two of the worst years of my life. Not that my situation is unique. I am a part of a generation that was told to go to college first and sort out the details later. Most of us did. We chased the promise of a big shiny future, and we ended up being chased by the mistakes of our past. That's

not to say we completely regretted going. This book isn't a list of privileged millennial complaints. It's a collection of wisdom gained in less than pleasant ways. It's a story of hardship, failure, victory, and perseverance. It's all of the things we wish someone had told us. And it takes place before college, in college, after college, and without college. This is the wild, painful, awkward, hilarious, depressing, & beautiful journey from youth to maturity. This is the college book that no one ever gave us.

Public funding for community colleges has been steadily declining since the peak of funding in the 1970s. Surviving the constant threats of budgetary cuts has been a key motivating factor for community colleges to embrace academic entrepreneurialism. I examined the academic entrepreneurial pursuits of one California Community College (CCC) to understand those factors that encourage community college faculty to pursue academic entrepreneurial solutions. The purpose of this qualitative study is to examine factors that encourage academic entrepreneurialism among community college faculty. Specifically, I investigated three categories of factors that influence academic entrepreneurialism: individual, institutional, and environmental. Individual factors include demographic and background characteristics, including age, race, gender, academic training, and previous professional careers. Institutional factors include program offerings available for students, institutional reputation and history, institutional policies and practices, and academic and administrative leadership. Environmental factors relate to the peer influences of a campus that encourages academic entrepreneurial behavior of faculty. The significance of this study lies in the identification of factors that encourage academic entrepreneurialism among community college faculty, ultimately supporting institutional efforts to augment funding. I investigated individual, institutional, and environmental factors that encourage academic entrepreneurialism among community college faculty. Accordingly, the research questions identify key factors that encourage academic entrepreneurialism among community college faculty and explain how they facilitate faculty to engage in academic entrepreneurialism. The research questions that I evaluated in this study are: What individual, institutional, and environmental factors influence community college faculty to engage in academic entrepreneurialism? What is the relationship between faculty background, institutional, and environmental characteristics and the frequency and quality of academic entrepreneurialism among community college faculty? I found that all three factors are essential elements of academic entrepreneurialism among community college faculty. Individual, institutional, and environmental factors consist of people who are all pursuing their self-interest. This follows the tenets of rational choice theory as the study finds that self-interest influences faculty academic entrepreneurialism. The study argues that changes to institutional policies are the key determining factor to encourage academic entrepreneurialism among community college faculty. Institutional policies determine how a college functions and understands the interrelationship between individual,

institutional, and environmental factors. Encouraging academic entrepreneurialism among community college faculty requires institutional policies that focus on the fundamental issue: recruiting, retaining, and evaluating community college faculty. The study offers suggestions for how to influence institutional policies that in turn encourage faculty academic entrepreneurialism by addressing the following areas: faculty job descriptions, faculty job announcements, evaluating faculty levels of academic entrepreneurialism, and offering entrepreneurial faculty financial incentives.

Groomed for a place at a Big Name School since their obsessed, status-conscious helicopter parents passed out cigars at the Stockstill General Hospital Neonatal Unit, the privileged students of Pembrocton College Preparatory are ratcheting up the stakes in the race to get into the nation's most prestigious colleges. The PCP juniors are gloating, jubilant at the rumor that the valedictorian presumptive has received a B on her report card, a grade that will relegate her to in-state hell. Her heir apparent, a three-generation Yale legacy, is the sole mourner at the demise of her future—if only because her thoughtless academic lapse is

going to derail his plans to attend MIT. Across town, in the graffiti-covered halls of Stockstill High School, the students slink to class, praying that they arrive without a knife wound—and dream of ivy-covered walls. And with the help of a take-no-prisoners principal and an enterprising parent, the students at SHS dare to encroach shamelessly on territory normally reserved for their wealthy private school rivals. Join the fray as a memorable cast of characters engages in the latest rage in extracurricular activities: college admissions as a blood sport. Laugh out loud funny, *The Applicants* lampoons the heights we scale—and the depths to which we sink—to get into the “right” college.

Volume one of the projected two-volume edition of "The Papers of Thaddeus Stevens" covers Steven's political career from his Vermont youth to the end of the Civil War. It includes letters and speeches from his early days as a Gettysburg lawyer and as a representative in the Pennsylvania assembly through his antislavery efforts to the 1865 passage of the Thirteenth Amendment, freeing all slaves.
