George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While *1984* and *Animal Farm* are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Politics and the English Language*, the second in the *Orwell's Essays* series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's *Politics and the English Language* is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can – and must – be rediscovered with every age.' — *Irish Times*

Can You Save The World? It's so easy to be overwhelmed by everything that is wrong in the world. In 2010, there were 660,000 deaths from malaria. Dire predictions about climate change suggest that sea levels could rise enough to submerge both Los Angeles and London by 2100. Bees are dying, not by the thousands but by the millions. But what can you do? You're just one person, right? The good news is that you *can* do something. It's called citizen science, and it's a way for ordinary people like you and me to do real, honest-to-goodness, help-answer-the-big-questions science. This book introduces you to a world in which it is possible to go on a wildlife survey in a national park, install software on your computer to search for a cure for cancer, have your smartphone log the sound pollution in your city, transcribe ancient Greek scrolls, or sift through the dirt from a site where a mastodon died 11,000 years ago-even if you never finished high school. Part I of *Be the Change: Saving the World with Citizen Science* will show you what citizen science is, how important it is, and why we need more of it. You will also find out how it can personally benefit you, how you can get involved, and what it might mean to you if you did. Part II provides a large list of projects that you can join right now, concisely explained, and organized by the level of involvement required. Citizen science is fun, it's easy, and you can get started today. *Be the Change: Saving the World with Citizen Science* will show you how. Show less

This edited book reflects a much needed area of scholarship as the voices of African American (AA) or Black students defined by various labels such as learning disability, blindness/visual impairment, cognitive development, speech or language impairment, and hearing impairment are rare within the scholarly literature. Students tagged with those identifiers within the Pk-20 academic system have not only been ignored, and discounted, but have also had their learning framed from a deficit perspective rather than a strength-based perspective. Moreover, it was uncommon to hear first person narratives about how AA students have understood their positions within the general education and special education systems. Therefore, with a pervasive lack of knowledge when it comes to understanding the experiences of AA with disabilities, this book describes personal experiences, and challenges the idea that AA students with disabilities are substandard. While this book will emphasize successful narratives, it will also provide counter-narratives to demystify the myth that those with disabilities cannot succeed or obtain terminal degrees. Overall, this edited book is a much needed contribution to the scholarly literature and may help teachers across a wide array of academic disciplines in meeting the academic and social needs of AA students with disabilities. ENDORSEMENTS: Dr. Shawn Robinson's collection of personal narratives raises critical questions about the U. S. public education system. Written by African Americans compartmentalized in special education programs because of actual or perceived disabilities, these stories will impel readers even tangentially affiliated with educational institutions to consider testing, placement, mainstreaming, retention and promotion, and other assessment policies that determine grade-level readiness. Thanks to Robinson, the

perspectives of these graduates who surmounted barriers to more positive and accommodating learning environments now receive proper attention. ~ John Pruitt, University of Wisconsin-Rock County With a bold vision, Dr. Shawn Anthony Robinson enters the discussion of Special Education with a collection of narratives that highlight the struggles and triumphs of marginalized students. In America, we have a long, contested history of “inclusion” of students of color and difference in our public, mainstream institutions. When these students are invited to the education table, they still must overcome persistent and pernicious barriers to true and equal educational opportunities. Consequently, students are left to “sink or swim” in oceans disparity and inequity. This collection of narratives and counter-narratives, confront the absence of adequate research and other empirical evidence of pedagogy and practice that would be essential to 21st Century progress in educational praxis. This volume represents one, important step towards adding new voices to the continuing struggle of meaningful inclusion. How might students of color and difference succeed in an education system that provides “no room to bloom? The authors address this challenge by exploring topics such as Aspirational Capital, Linguistic Capital, Familial Capital, Social Capital, Navigational Capital and Resistance Capital. The reader will be exposed to ideas that will help students “make a way out of no way” by working both within and against educational systems full of barriers and opportunities. Congratulations to Dr. Robinson and his colleagues as the content of this volume represents an important contribution to the extant literature. ~ Gregory A. Diggs , Denver, Colorado

The book that Inc. says "every entrepreneur should read" and an FT Book of the Month selection... How did the movie The Shawshank Redemption fail at the box office but go on to gross more than \$100 million as a cult classic? How did The 48 Laws of Power miss the bestseller lists for more than a decade and still sell more than a million copies? How is Iron Maiden still filling stadiums worldwide without radio or TV exposure forty years after the band was founded? Bestselling author and marketer Ryan Holiday calls such works and artists perennial sellers. How do they endure and thrive while most books, movies, songs, video games, and pieces of art disappear quickly after initial success? How can we create and market creative works that achieve longevity? Holiday explores this mystery by drawing on his extensive experience working with businesses and creators such as Google, American Apparel, and the author John Grisham, as well as his interviews with the minds behind some of the greatest perennial sellers of our time. His fascinating examples include: • Rick Rubin, producer for Adele, Jay-Z, and the Red Hot Chili Peppers, who teaches his artists to push past short-term thinking and root their work in long-term inspiration. • Tim Ferriss, whose books have sold millions of copies, in part because he rigorously tests every element of his work to see what generates the strongest response. • Seinfeld, which managed to capture both the essence of the nineties and timeless themes to become a modern classic. • Harper Lee, who transformed a muddled manuscript into To Kill a Mockingbird with the help of the right editor and feedback. • Winston Churchill, Stefan Zweig, and Lady Gaga, who each learned the essential tenets of building a platform of loyal, dedicated

supporters. Holiday reveals that the key to success for many perennial sellers is that their creators don't distinguish between the making and the marketing. The product's purpose and audience are in the creator's mind from day one. By thinking holistically about the relationship between their audience and their work, creators of all kinds improve the chances that their offerings will stand the test of time.

This book reflects and extends the great debates that schools, colleges, and universities are having in response to the profound moral conflicts and personal questions facing professionals today: What should we teach our students? What values should we communicate and nurture? What should be the role of the traditional liberal arts in professional education? How should schools and colleges respond to the

demands of women and minorities for a more inclusive curriculum? The authors explore ongoing theoretical and practical considerations of graduate professional education through the ethical and social issues facing professionals in public service. Administrators, teachers, counselors, nurses, or lawyers are recognizing that they face similar questions about their personal and professional lives: Is it possible to sustain a set of fully human values as a practicing professional? As a member of a public organization, how does one deal with dilemmas involving conflicting priorities and ambiguous goals? The authors responses to these questions are presented as themes, describing connections between curriculum and pedagogy. They have designed an approach to ethical and social questions respectful of the contributions of adult learners and the need to provide diverse perspectives.

Editing is an invisible art where the very best work goes undetected. Editors strive to create books that are enlightening, seamless, and pleasurable to read, all while giving credit to the author. This makes it all the more difficult to truly understand the range of roles they inhabit while shepherding a project from concept to publication. In *What Editors Do*, Peter Ginna gathers essays from twenty-seven leading figures in book publishing about their work. Representing both large houses and small, and encompassing trade, textbook, academic, and children's publishing, the contributors make the case for why editing remains a vital function to writers—and readers—everywhere. Ironically for an industry built on words, there has been a scarcity of written guidance on how to actually approach the work of editing. This book will serve as a compendium of professional advice and will be a resource both for those entering the profession (or already in it) and for those outside publishing who seek an understanding of it. It sheds light on how editors acquire books, what constitutes a strong author-editor relationship, and the editor's vital role at each stage of the publishing process—a role that extends far beyond marking up the author's text. This collection treats editing as both art and craft, and also as a career. It explores how editors balance passion against the economic realities of publishing. *What Editors Do* shows why, in the face of a rapidly changing publishing landscape, editors are more important than ever.

"[A] stunning tale of academic fraud . . . shocking and compelling."-The Washington Post Dave Tomar wrote term papers for a living. Technically, the papers were "study guides," and the companies he wrote for-there are quite a few-are completely aboveboard and easily found with a quick web search. For as little as ten dollars a page, these paper mills provide a custom essay, written to the specifics of any course assignment. During Tomar's career as an academic surrogate, he wrote made-to-order papers for everything from introductory college courses to Ph.D. dissertations. There was never a shortage of demand for his services. *The Shadow Scholar* is the story of this dubious but all-too-common career. In turns shocking, absurd, and ultimately sobering, Tomar explores not merely his own misdeeds but the bureaucratic and cash-hungry colleges, lazy students, and even misguided parents who help make it all possible.

In *My Paper Chase*, Harold Evans recounts the wild and wonderful tale of newspapering life. His story stretches from the 1930s to his service in WWII, through towns big and off the map. He discusses his passion for the crusading style of reportage he

championed, his clashes with Rupert Murdoch, and his struggle to use journalism to better the lives of those less fortunate. There's a star-studded cast and a tremendously vivid sense of what once was: the lead type, the smell of the presses, eccentrics throughout, and angry editors screaming over the intercoms. My Paper Chase tells the story of Evans's great loves: newspapers and Tina Brown, the bright, young journalist who became his wife. In an age when newspapers everywhere are under threat, My Paper Chase is not just a glorious recounting of an amazing life, but a nostalgic journey in black and white.
