In the high-tech and fast-paced world, we need to make time to remember our true nature and align with the peace and serenity that come from within. Meditation and ritual can serve to bring about those more peaceful states of harmony and well-being. In Pathways to Restore the Feminine, author Kirsty E. Green shows how to establish practices that enhance the feminine aspect of our being. The practices focus on transforming each person within their own unique, authentic potential, allowing us to awaken and see life through the eyes of the heart. Green draws these practices from more than twenty years of experience working in alternative therapies areas, counseling, clairvoyant work, energy healing, grief and transition ceremonies, and meditation days in the forests in and around Melbourne, Victoria. Pathways to Restore the Feminine presents thoughtful and caring words of guidance and inspiration for women, showing that ritual and meditation are easy once you make a habit of creating time throughout your day.

The first step in picking out the correct products and in making homemade creams and a lotion is to use something that's right for you. Depending on your age, diet and genetics you will primarily fall into one of the following 5 skin types: 1. Normal Skin The simplest to maintain normal skin has little to no oily spots, maintains regular circulation with little to no trouble spots. It's fairly elastic and looks healthy with very little make-up and attention. 2. Oily Skin Most prone to breakouts, the trouble zones are usually in the T zone of your face (forehead, nose and chin); oily skin tends to have oversized pores and can look greasy or shiny. With the right creams and proper diet its oil levels can be maintained. Oily skin tends not to have much wrinkling or aging. 3. Dry Skin Most people with dry skin feel tightness after washing their face and easily flake around the mouth and nose with dry spots. Dry skin is prone to aging and wrinkling and it's important to properly moisturize and nourish it regularly. 4. Sensitive Skin The sensitive skin type becomes irritated easily, gets red and dry spots and breaks out easily. This skin type is like a historical map - it tends to wear all of its battles for all to see. The type of creams and lotions applied on sensitive skin is extremely important as an irritation or reaction can occur with certain ingredients and chemicals. 5. Combination Skin The most common skin type in women, combination skin is both oily and dry. Combination skin tends to be dry on the cheeks and around the eyes and oily spots on the forehead and nose. IT requires more cleansing in the oily areas and sensitive creams without too much oil in the dry areas. In this guide we focus on the three extreme skin cases grouping normal, combination and sensitive into a Sensitive Category. Because combination and normal skin is the most adaptable to most products, anything created for sensitive skin will only promote health and the look of younger, suppler skin with a clear complexion. The other two are oily and dry skin types.
