Do your kids love animals? Elliot takes on an adventure following a group of raccoons all around Sag Harbor the night before the town's annual HarborFest celebrations. He watches the plump little comedians feast on a buffet of discarded food as they run from place to place, leaving messes in their wake. If only the owners of those trash bins learned what Elliot had learned from a wildlife expert at school. Elliot is just a secret observer until he has the chance to help and forms a bond with the adorable group of raccoons! Funny and empowering, the Elliot's Adventures children's books are an ode to loving the world we live in by respecting nature and wildlife. The stories are designed to stimulate children's imaginations and encourage unstructured outdoor play at a time when kids are spending more hours than ever behind a screen each day. A mother and son collaboration, this series is a celebration of parents and children everywhere. A perfect book for parents and kids who: - Enjoy silly adventures - Love to learn about animals - Care about the environment - Want to protect wildlife - Believe kids can make a difference.

"Hormegeddon" is the term coined by entrepreneur and New York Times Bestselling Author Bill Bonner to describe what happens when you get too much of a good thing in the sphere of public policy, economics and business. Simply put, it ends in disaster.

Drawing on stories and examples from throughout modern political history-from Napoleon's invasion of Russia to the impending collapse of the American healthcare system, from the outbreak of WWII and the fall of the Third Reich to the 21st century War on Terror, from the Great Recession to the sovereign debt crisis-Bonner pursues a modest ambition: to understand what goes wrong. History is not a clean yarn spun by its victors. It is a long tale of things that went FUBAR-debacles, disasters, and catastrophes. That each disaster carries with it a warning is what makes it useful to study. For instance, if the architect of a great ship tells you that 'not even God himself could sink this ship, ' you should take the next boat. If the stock market is selling at 20 times earnings and all the expert analysts urge you to 'get in' because you 'can't lose'-it's time to get out! Similarly, public policy disasters are what you get when well meaning people with this same Titanic degree of certitude apply rational, small-scale problem-solving logic to inappropriately large scale planning. First, you get a declining rate of return on your investment (of time or resources) until you hit zero. Then, if you keep going through the zero floor-and you always keep going-you get a disaster. The problem is, these disasters cannot be stopped by well-informed smart people with good intentions, because they are the people who cause them in the first place. From the mind of Bill Bonner comes Hormegeddon, a phenomenon that occurs when a small dose of something produces a favorable result, but if you increase the dosage, the results end in disaster. The same applies when the world gets too much of a good thing in public policy, economics, and business. Drawing on examples throughout modern political history, Bonner brings context and understanding to this largely ignored and anonymous phenomenon.

With the growth of practitioner research, this book leads the way by addressing key issues faced by 'insider researchers' – those doing research projects in the organizations and communities in which they themselves work, or where they are already familiar with the setting. The authors explore the implications of these research contexts, and discuss approaches and methodologies that researchers in these contexts might adopt, with a particular focus on ethics - one of the key concerns for students undertaking a research project of this type.

Presents a selection of the author's poems from throughout his life, from playful early poems to themes of mourning and loss.

"Siblings Bob and Tom get a dog with spots. This A-level story uses decodable text to raise confidence in early readers. The book uses a combination of sight words and short-vowel words in repetition to build recognition. Original illustrations help guide readers through the text."--

Based on the successful Baby Owner's Manual, The Baby Owner's Maintenance Log presents a refreshing alternative to traditional sugar-sweet baby journals. Hip parents can record all major milestones and measurements in these pages, including the arrival of the unit, fuel preferences and speech activation. Spiral binding, hilarious illustrations and a bound-in envelope for keepsakes make this guided journal a great shower gift.

100 years ago, Einstein's theory of relativity shattered the world of physics. Our comforting Newtonian ideas of space and time were replaced by bizarre and counterintuitive conclusions: if you move at high speed, time slows down, space squashes up and you get heavier; travel fast enough and you could weigh as much as a jumbo jet, be squashed thinner than a CD without feeling a thing - and live for ever. And that was just the Special Theory. With the General Theory came even stranger ideas of curved space-time, and changed our understanding of gravity and the cosmos. This authoritative and entertaining Very Short Introduction makes the theory of relativity accessible and understandable. Using very little mathematics, Russell Stannard explains the important concepts of relativity, from $E=mc^2$ to black holes, and explores the theory's impact on science and on our understanding of the universe. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

About the Book: This book is an attempt to consolidate the basic scientific studies in the machining area so that fundamental mechanics and other concepts related to primary machining processes could be understood. The book is essentially designed for senior undergraduate mechanical and production engineering students but practicing engineers will also find it useful for tool and product design. The topics covered include plastic deformation, chip formation, tool geometry, mechanics of orthogonal and oblique cutting, measurement of cutting force, cutting temperature, tool wear and

tool life, economics of machining, grinding of metals and machining vibrations. The analyses presented have been illustrated through numerical examples. Review questions and bibliography are also included. About the Author: Dr. G.K. Lal has been associated with the Indian Institute of Technology, Kanpur for the past 34 years. He retired as a Professor of Mechanical Engineering in 2003 and had earlier held the positions of Dean (1976-80) and Deputy Director (1982-88). Before joining IIT Kanpur he had taught at the Banaras Hindu University and held research positions at the University of Sherbrooke (Canada) and the Carnegie-Mellon University (USA). He also worked as a Design Engineer with the Abitibi Paper and Power Corp. of Canada.

When civil war erupts in Somalia, cousins Domenica Axad and Barni are separated and forced to flee the country. Barni manages to eke out a living in Rome, where she works as an obstetrician. Domenica wanders Europe in a painful attempt to reunite her broken family and come to terms with her past. After ten years, the two women reunite. When Domenica gives birth to a son, Barni, also known as Little Mother, is at her side. Together with the new baby, Domenica and Barni find their Somali roots and start to heal the pain they have suffered in war and exile. This powerful yet tender novel underscores the strength of women, family, and community, and draws on the tenacious yearning for a homeland that has been denied.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

On the occasion of the 90th anniversary of Pininfarina, a marque synonymous with style and elegance applied to car design, Pininfarina is a book that surveys, for the first time, the entire output of the Turin coachbuilder, model by model. Produced in close collaboration with the company, it draws on invaluable photographic material accompanying brief contextualising texts. Tracing the history of Pininfarina from its origins to the present day entails reviewing some of the most iconic models in automotive history: from the numerous Ferraris bodied by the historic partner of the Maranello firm to cars such as the Cisitalia 202, the Lancia Aurelia, the Alfa Romeo Duetto and 164, the Maserati GranTurismo through to the current models born under the aegis of the Indian firm Mahindra. The book also covers the numerous Pininfarina concept cars that have written glorious pages in the history of design, raising the bar every time in terms of the excellence of the car product.

During a zombie apocalypse, the important thing is to not panic. Actually, that's not true. Definitely panic. These things are going to try to eat your face off! Sam and Arty are looking forward to summer vacation so much that they barely notice when their bumbling science teacher causes an explosion of purple goo that drenches their classmate, Simon. They're sure Simon will be fine—he looks a little gray, but things like this happen all the time in the town of Sitting Duck. But Simon is not fine—and totally loses his head when he becomes a zombie! Soon the town is crawling with rabid zombies looking for braaaaaains! The adults are busy panicking and screaming, so it's up to Sam (the leader) Arty (the brains), and their friend Emmie (the rebel) to take charge. If they can't find a cure, it will be a disaster! Disaster Diaries: Zombies! is perfect for young readers, reluctant or otherwise, with a wacky sense of humor. The first in this hilarious middle grade series from author R. McGeddon will prepare you for your own zombie infestation, with handy tips like how to spot zombies. (Hint: their faces are falling off). An Imprint Book

This oversized lift-the-flap board book of a child's first 101 words has big, clearly labeled photos of objects in a baby and toddler's world with an interactive puzzle activity on each spread. Identifying words and their meanings is an important foundational step in language development for babies and toddlers, and Highlights brings Fun with a Purpose® into this essential learning. Babies will love looking at and naming the photos in this sturdy book, while toddlers and parents will enjoy the lift-the-flap questions and answers that help them find the cute red bird hidden on each spread.

How do you go from being happily married, beautiful children and a growing ministry to being homeless, children taken and no job. I lost so much I felt alone. In the midst of my life going into a downward spiral, I held on to my God. I can truly say I went from the

NATIONAL BESTSELLER ONE OF THE BEST BOOKS OF THE YEAR: VOGUE * FRESH AIR As a professor of physics at MIT, Helen Clapp disdains notions of the supernatural in favor of rational thought and proven ideas. So it's perhaps especially vexing when, on an otherwise unremarkable Wednesday in June, she gets a phone call from a friend who has just died. That friend was Charlotte Boyce, Helen's roommate at Harvard. The two women once confided in each other about everything: Helen's struggles as a young woman in science, Charlie's as a black screenwriter in Hollywood, their shared challenges as parents. But as the years passed, they gradually grew apart. And now Charlie is permanently, tragically gone. Drawn back into her friend's orbit, Helen is forced to question the laws of the universe that have always steadied her mind and heart. Suspenseful, perceptive, deeply affecting, *Lost and Wanted* is a story of friends and lovers, lost and found, at the most defining moments of their lives.

The QRI-5 has long led the field in offering students and teachers alike a reliable and easy-to-use informal assessment instrument. This Fifth Edition continues to emphasize authentic assessment of children's reading abilities, from the most emergent readers to advanced readers. One of the keys to the success of the QRI-5 is that it contains narrative and expository passages at each pre-primer through high school level. All are self-contained selections highly representative of the structure and topic of materials found in basal readers and content-area textbooks. This new edition includes new narrative texts that are even easier than the pre-primer passages previously included. At the same time, it provides graded word lists and numerous passages designed to assess the oral reading, silent reading, or listening comprehension of a student as well as questions to assess prior knowledge. Instructors can measure comprehension by retelling passages, using implicit and explicit questions, and using other devices. What's New in the QRI-5? # Narrative texts even easier than the pre-primer passages previously included, as well as another narrative to all primary grade levels. # Passages at pre-primer through second grade levels that are presented with and without pictures. # Map and illustrations as part of expository selections at fourth through high school levels. # Accompanying DVD content has been expanded to include * Examples of students reading orally * Scored protocols to accompany readings * Directions for administering each segment of the QRI * Tables/Charts that increase consistency of administration, scoring, and interpretation *
