#1 NEW YORK TIMES BESTSELLER • “The clearest and best book out there to get you on the path to riches. This one’s special!”—Jim Cramer, host of CNBC’s *Mad Money* “Great tools for anyone wanting to dabble in the stock market.”—USA Today Phil Town is a very wealthy man, but he wasn’t always. In fact, he was living on a salary of \$4,000 a year when some well-timed advice launched him down a highway of investing self-education that revealed what the true “rules” are and how to make them work in one’s favor. Chief among them, of course, is Rule #1: “Don’t lose money.” In this updated edition to the #1 national bestseller, you’ll learn more of Phil’s fresh, think-outside-the-box rules, including:

- Don’t diversify
- Only buy a stock

when it's on sale • Think long term—but act short term to maximize your return • And most of all, beat the big investors at their own game by using the tools designed for them! As Phil demonstrates in these pages, giant mutual funds can't help but regress to the mean—and as we've all learned in recent years, that mean could be very disappointing indeed. Fortunately, Rule #1 takes readers step-by-step through a do-it-yourself process, equipping even the biggest investing-phobes with the tools they need to make quantum leaps toward financial security—regardless of where the market is headed. Written in an accessible style, an introduction to the basics of investing explains how to read a stock table in the newspaper, understand an annual report, and why everyone should pay attention to the stock market. A beginner's guide to investing in stocks and bonds, including reasons for investing and hints on what, when, and how to buy.

Very few careers can offer you the freedom, flexibility and income that day trading does. As a day trader, you can live and work anywhere in the world. You can decide when to work and when not to work. You only answer to yourself. That is the life of the successful day trader. Many people aspire to it, but very few succeed. Day trading is not gambling or an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere. At the beginning of my trading career, a pharmaceutical company announced some positive results for

one of its drugs and its stock jumped from \$1 to over \$55 in just two days. Two days! I was a beginner at the time. I was the amateur. I purchased 1,000 shares at \$4 and sold them at over \$10. On my very first beginner trade, I made \$6,000 in a matter of minutes. It was pure luck. I honestly had no idea what I was doing. Within a few weeks I had lost that entire \$6,000 by making mistakes in other trades. I was lucky. My first stupid trade was my lucky one. Other people are not so lucky. For many, their first mistake is their last trade because in just a few minutes, in one simple trade, they lose all of the money they had worked so hard for. With their account at zero, they walk away from day trading. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly equipped with advanced education and tools, and most importantly, committed to making money. Day trading is not gambling. It is not a hobby. You must approach day trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. Rolling out of bed and throwing water on your face 15 minutes before the opening bell just does not give you sufficient time to be prepared for the market's opening. Sitting at your computer in your pajamas or underwear does not put you in the right mindset to attack the market. I know. I've experienced all of these scenarios. In *How to Day Trade for a Living*, I will show you how you too can take control over your life and have success in day trading on the stock market. I

love teaching. It's my passion. In this book, I use simple and easy to understand words to explain the strategies and concepts you need to know to launch yourself into day trading on the stock market. This book is definitely NOT a difficult, technical, hard to understand, complicated and complex guide to the stock market. It's concise. It's practical. It's written for everyone. You can learn how to beat Wall Street at its own game. And, as a purchaser of my book, you will also receive a membership in my community of day traders at www.vancouver-traders.com. You can monitor my screen in real time, watch me trade the strategies explained in his book, and ask questions of me and other traders in our private chat room. I invite you to join me in the world of day trading. I'm a real person who you can connect with. I'm not just a photograph here on the Amazon site. I love what I do. You can follow my blog post under Author Updates on my Author page on Amazon. It's honest. You'll see I lose some days. You can read the reviews of my book. As an investor, the stock market offers you the opportunity to increase your income without taking on the high risks that are usually associated when venturing in other businesses. By selling stocks, the company raises capital and is able to expand itself exponentially. Therefore, as an investor, when you purchase shares of a company, you have increased the worth of the company. Thus it's a win-win situation for both investor and owner. The negative risk associated with the stock market can be small or large, but it all depends on the number of shares of stock that you, as an investor, have bought. Therefore, if a company's stock shares lose value, the stocks you have bought also loses value, and if you decide to sell your stocks when the value is low, you will have incurred a loss. I will show you how you can minimize your risks and show you different ways in which investors are not only making money, but are also building with the stock market.

There are two types of investment funds: mutual funds and exchange-traded funds (ETFs). Mutual funds are managed by professional fund managers and typically have a minimum investment of \$1,000. ETFs are traded on the stock market and can be bought and sold like individual stocks. They are often used for diversification and can be purchased in smaller increments than mutual funds. Both types of funds offer a way to invest in a variety of assets, such as stocks, bonds, and commodities. However, mutual funds typically have higher fees and may be more difficult to sell than ETFs. It's important to do your research and understand the risks and benefits of each type of fund before investing.

You might need in the short term. That includes a cushion for emergency. The Eureka Market or the Stock Market? It often known that market for buying and selling shares in public companies. Shareholders own an ownership interest in the company and usually have a claim on future earnings. The stock market generally reflects the value of the company and it is the market that buys and sells the shares together to trade. The company's value and value which is reflected in this market is known as stock exchange. Some of the biggest and most famous are the New York Stock Exchange (NYSE) and Japanese Exchange Group (JPX). The market participants in the market include individuals (like you and me), organizations that trade on behalf of others (think banks, hedge funds, etc.) and financial institutions (they could be trading on their own account or for their clients). The dramatic increase in stock prices in the 1990s and the following crash beginning in 2000 are vivid examples of the strong correlation between stock markets and economic activity. Recent literature demonstrates the link between stock markets in the USA and the rest of the world [Eun and Shim (1989) and Susmel and Engle (1994), among others].

Mutual-fund superstar Peter Lynch and author John Rothchild explain the basic principles of the stock market and business in an investing guide that will enlighten and entertain anyone who is high-school age or older. Many investors, including some with substantial portfolios, have only the sketchiest idea of how the stock market works. The reason, say Lynch and Rothchild, is that the basics of investing—the fundamentals of our economic system and what they have to do with the stock market—aren't taught in school. At a time when individuals have to make important decisions about saving for college and 401(k) retirement funds, this failure to provide a basic

education in investing can have tragic consequences. For those who know what to look for, investment opportunities are everywhere. The average high-school student is familiar with Nike, Reebok, McDonald's, the Gap, and the Body Shop. Nearly every teenager in America drinks Coke or Pepsi, but only a very few own shares in either company or even understand how to buy them. Every student studies American history, but few realize that our country was settled by European colonists financed by public companies in England and Holland—and the basic principles behind public companies haven't changed in more than three hundred years. In *Learn to Earn*, Lynch and Rothchild explain in a style accessible to anyone who is high-school age or older how to read a stock table in the daily newspaper, how to understand a company annual report, and why everyone should pay attention to the stock market. They explain not only how to invest, but also how to think like an investor. For almost three decades, the *Stock Market Primer* has helped nearly half a million investors up the ladder of financial success. Revised, updated, and adjusted to the new tax code, here's sound advice on what to buy, how much to pay, when to sell for maximum return on investment, and much more.

I met Paqui in Granada, attending the official presentation of her book. After her speech, she approached me to say: "I work as a trader, a couple of hours a day and I make money. My broker is in the USA and I only operate intraday". Astonished and eyes wide open, it took me a while to answer back. Ignorant and layman, I then decided to come clean: "Sorry, Paqui... can you please tell me what is that trading stuff about?" To my surprise, in simple words, lots of pedagogics and warm enthusiasm she explained me the basics of a thrilling activity to everyone's reach as long as you are motivated and focused on being trained... and that is how this manual was born. In this book, the authoress unveils her secrets: The basics of trading , general ideas on stock markets knowledge and practical advice that will allow anyone interested to start diving safely in such vibrant activity. On a simple but intelligent way, she shares with her readers the knowledge acquired along her successful career. However, she does not limit herself to passively repeating basics of stock markets theory but leads by example. At first she made – and still makes – money with her trading activity, but afterwards she was willing to open the doors of her "knowledge base" to everyone, a beautiful gesture most of her readers will be grateful for life.
