Available with student learning packages at the instructor's discretion, this separate booklet includes answers to all discrete and short answer exercises in the Student Activities Manual, so students can monitor their own progress.

This groundbreaking, open access volume analyses and compares data practices across several fields through the analysis of specific cases of data journeys. It brings together leading scholars in the philosophy, history and social studies of science to achieve two goals: tracking the travel of data across different spaces, times and domains of research practice; and documenting how such journeys affect the use of data as evidence and the knowledge being produced. The volume captures the opportunities, challenges and concerns involved in making data move from the sites in which they are originally produced to sites where they can be integrated with other data, analysed and re-used for a variety of purposes. The in-depth study of data journeys provides the necessary ground to examine disciplinary, geographical and historical differences and similarities in data management, processing and interpretation, thus identifying the key conditions of possibility for the widespread data sharing associated with Big and Open Data. The chapters are ordered in sections that broadly correspond to different stages of the journeys of data, from their generation to the legitimisation of their use for specific purposes. Additionally, the preface to the volume provides a variety of alternative “roadmaps” aimed to serve the different interests and entry points of readers; and the introduction provides a substantive overview of what data journeys can teach about the methods and epistemology of research.

The first edition of Percorsi quickly became one of the best-selling elementary Italian texts. The new second edition features a new design, more focus on skills-development, updated cultural information and a full version of MyItalianLab. Percorsi is an introductory program that promotes the acquisition of Italian language and culture through the integration of the “5 Cs” principles of the National Standards for Foreign Language Education. Percorsi is designed to provide beginning learners with a variety of tools to develop their communicative competence in the four major language skills—listening, speaking, reading, and writing—as they acquire familiarity with Italian culture. All of the features in Percorsi have been carefully thought out to support the two key aspects of the language acquisition process: language comprehension and language production. From the start, carefully structured communicative activities based on authentic materials and texts encourage students to use Italian in everyday situations. Generous use of authentic content also offers students a chance to develop reading skills while gaining cultural awareness and understanding of Italian communities and traditions throughout the world. In addition, each chapter explicitly promotes cultural exploration through illustrated presentations that are followed by activities facilitating comprehension and highlighting cultural comparisons. Students are encouraged to analyze and compare extremely varied aspects of Italian culture while making connections to their own experiences. MyItalianLab will be available for Fall 2011 courses.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Caleidoscopio offers a highly innovative and interactive review of Italian grammar at the intermediate level combined with a “kaleidoscope” of content, spanning diverse genres and aspects of Italian culture. The program was conceived and developed based on three major principles: (1) successful programs in Italian and Italian Studies place a strong emphasis on culture and exposing students to contemporary and non contemporary history, art, literature, cinema, popular culture, to name a few; (2) students are most engaged in coursework that integrates the study of culture with the study of language in a rich variety of ways; (3) student-centered learning and

proficiency-based practice across a variety of content areas results in achieving extraordinary communicative outcomes. Rich in its array of reading selections, each chapter contains three carefully selected authentic readings. Authors represent different time periods (some are very young and recently published, others are well-known writers from the 20th-century “canon”) and offer a unique point of view on different socio-cultural aspects of that region’s life. Readings vary greatly in difficulty and length as well as in style and tone; they include unabridged and abridged short stories, excerpts from novels or plays, interviews, and newspaper articles. Male and female writers are equally represented.

This edited collection examines the relationship between three central terms—capitalism, feminism, and critique—while critically celebrating the work and life of a thinker who has done the most to address this nexus: Nancy Fraser. In honor of her seventieth birthday, and in the spirit of her work in the tradition of critical theory, this collection brings together scholars from different disciplines and theoretical approaches to address this conjunction and evaluate Fraser’s lifelong contributions to theorizing it. Scholars from philosophy, political science, sociology, gender studies, race theory and economics come together to think through the vicissitudes of capitalism and feminism while also responding to different elements of Nancy Fraser’s work, which weaves together a strong feminist standpoint with a vibrant and complex critique of capitalism. Going beyond conventional disciplinary distinctions and narrow debates, all the contributors to this project share a commitment to critically understanding the connection between capitalism, exploitation, and the viable roads for emancipation. They recover insights provided by classical traditions of political and social thought, but they also open new research directions adapted to the global challenges of our time.

Mice have long been recognized as a valuable tool for investigating the genetic and physiological bases of human diseases such as diabetes, infectious disease, cancer, heart disease, and a wide array of neurological disorders. With the advent of transgenic and other genetic engineering technologies, the versatility and usefulness of the mouse as a

Despite explicit commitments to gender equality, women experience complex modes of disadvantage and discrimination in all nations of the world. Offering sophisticated insights into the persistence of gendered differences in opportunities, roles, power, and rights in societies across the globe, this volume investigates factors that both enable and constrain women's advancement. From intimate relations within families, to social norms, relations, ideologies, and structures of power, to political institutions, electoral systems, and public policies, the chapters analyze possibilities for and obstacles to inclusive democratic practices and identify interventions essential to enable democratic values to take root. Contributors from Africa, Asia, Europe, Latin America, and the USA provide detailed assessments of the social, economic, and political condition of women, their mobilizations to produce transform gendered power and authority in diverse nations, and their efforts to enhance the quality of their lives, their communities, and democratic governance.

Bernard Ollivier pushes onward in his attempt to become the first person to walk the entire length of the Great Silk Road. “A gripping account. More than just a travel story—this is a quest for the Other.”—Alexis Liebaert, *L’Événement* Picking up where *Walking to Samarkand* left off, *Winds of the Steppe* continues the astonishing tale of journalist Bernard Ollivier’s 7,200-mile walk from Turkey to China along the Silk Road, the longest and most mythical trade route of all time. Taking readers from the snows of the Pamir Mountains to the backstreets of Kashgar—a Central Asian city that could be the setting for *One Thousand and One Nights*—to the Tian Shan Mountains to the endless Taklamakan and Gobi Deserts of China’s Xinjiang Uyghur Autonomous Region, Bernard Ollivier continues his epic foot journey along the Great Silk Road hoping to make his way to Han China and reach, at long last, the legendary city of Xi’an. After traveling through a region dotted with former

Buddhist shrines, Ollivier finds himself craving the warm welcome of Islamic lands, where, regardless of their culture or nationality, travelers are often treated as esteemed guests. Beyond the occasional vestige of the old Silk Road, Ollivier comes face to face with sites of religious significance, China's Great Wall, and of course thousands of everyday people along the way. As Ollivier tries to make sense of his journey and find connections between these people's daily lives and the so-called "modern" world, he does so with a sense of humility that transforms his personal journey into a universal quest.

Percorsi has quickly become one of the best-selling elementary Italian programs of its kind. The new Third Edition features *Ritorno a Roma*, an educational romantic comedy filmed on location in Rome, Siena, and Naples, a vibrant new design, even more focus on skill-development, updated cultural information, and expansion of MyItalianLab. Percorsi promotes the acquisition of Italian language and culture through a media-rich program that integrates the "five C's" principles of the National Standards for Foreign Language Education. Building on the success of earlier editions, the Third Edition is designed to provide beginning learners with a variety of tools to develop their communicative competence in the four major language skill area--listening, speaking, reading, and writing--as they acquire familiarity with Italian culture. At its core is a brand new film, *Ritorno a Roma*. Produced by the 2012 Golden Globe winner for Best Short, *Ritorno a Roma* is the first educational romantic comedy created exclusively for learners of beginning Italian. The film, created to support the learning of Italian for users of Percorsi and exclusively written with students in mind, takes place in Roma and features scenes in Roma, Gaeta, Napoli, and Siena. It follows the trials and tribulations of four main characters--Taylor, Giulia, Elena, and Roberto--as Roberto attempts to win a national recording contract for the band that he manages. *Ritorno a Roma* provides an engaging, natural context for the practice of structure and vocabulary, while introducing students to colloquial language and providing them a firsthand look at Italian life and culture. The purpose of this volume is to investigate the crucial role played by the return of knowledge of Greek in the transformation of European culture, both through the translation of texts, and through the direct study of the language. It aims to collect and organize in one database all the digitalised versions of the first editions of Greek grammars, lexica and school texts available in Europe in the 14th and 15th centuries, between two crucial dates: the start of Chrysoloras's teaching in Florence (c. 1397) and the end of the activity of Aldo Manuzio and Andrea Asolano in Venice (c. 1529). This is the first step in a major investigation into the knowledge of Greek and its dissemination in Western Europe: the selection of the texts and the first milestones in teaching methods were put together in that period, through the work of scholars like Chrysoloras, Guarino and many others. A remarkable role was played also by the men involved in the Council of Ferrara (1438-39), where there was a large circulation of Greek books and ideas. About ten years later, Giovanni Tortelli, together with Pope Nicholas V, took the first steps in founding the Vatican

Library. Research into the return of the knowledge of Greek to Western Europe has suffered for a long time from the lack of intersection of skills and fields of research: to fully understand this phenomenon, one has to go back a very long way through the tradition of the texts and their reception in contexts as different as the Middle Ages and the beginning of Renaissance humanism. However, over the past thirty years, scholars have demonstrated the crucial role played by the return of knowledge of Greek in the transformation of European culture, both through the translation of texts, and through the direct study of the language. In addition, the actual translations from Greek into Latin remain poorly studied and a clear understanding of the intellectual and cultural contexts that produced them is lacking. In the Middle Ages the knowledge of Greek was limited to isolated areas that had no reciprocal links. As had happened to many Latin authors, all Greek literature was rather neglected, perhaps because a number of philosophical texts had already been available in translation from the seventh century AD, or because of a sense of mistrust, due to their ethnic and religious differences. Between the 12th and 14th century AD, a change is perceptible: the sharp decrease in Greek texts and knowledge in the South of Italy, once a reference-point for this kind of study, was perhaps an important reason prompting Italian humanists to go and study Greek in Constantinople. Over the past thirty years it has become evident to scholars that humanism, through the re-appreciation of classical antiquity, created a bridge to the modern era, which also includes the Middle Ages. The criticism by the humanists of medieval authors did not prevent them from using a number of tools that the Middle Ages had developed or synthesized: glossaries, epitomes, dictionaries, encyclopaedias, translations, commentaries. At present one thing that is missing, however, is a systematic study of the tools used for the study of Greek between the 15th and 16th century; this is truly important, because, in the following centuries, Greek culture provided the basis of European thought in all the most important fields of knowledge. This volume seeks to supply that gap.

The Resonance of Unseen Things offers an ethnographic meditation on the “uncanny” persistence and cultural freight of conspiracy theory. The project is a reading of conspiracy theory as an index of a certain strain of late 20th-century American despondency and malaise, especially as understood by people experiencing downward social mobility. Written by a cultural anthropologist with a literary background, this deeply interdisciplinary book focuses on the enduring American preoccupation with captivity in a rapidly transforming world. Captivity is a trope that appears in both ordinary and fantastic iterations here, and Susan Lepselter shows how multiple troubled histories—of race, class, gender, and power—become compressed into stories of uncanny memory. “We really don’t have anything like this in terms of a focused, sympathetic, open-minded ethnographic study of UFO experiencers. . . . The author’s semiotic approach to the paranormal is immensely productive, positive, and, above all, resonant with what actually happens in history.” —Jeffrey J. Kripal, J. Newton Rayzor Professor of Religion, Rice University “Lepselter relates a weave of intimate alien sensibilities in out-of-the-way places which are surprisingly, profoundly, close to home. Readers can expect to share her experience of contact with complex logics of feeling, and to do so in a contemporary America they may have thought they understood.” —Debbora Battaglia, Mount Holyoke College “An original and beautifully written study of contemporary American cultural poetics. . . . The book convincingly brings into relief the anxieties of those at the margins of

American economic and civic life, their perceptions of state power, and the narrative continuities that bond them to histories of violence and expansion in the American West.” —Deirdre de la Cruz, University of Michigan

When first published in 1926 this book aroused much controversy. The theory expounded in the book was that Islamic sources in general, and the writings of Ibn al-`Arabi in particular, formed the basis of Dante's poem Divine Comedy, the poem which symbolised the whole culture of medieval Christianity. The book shows how fundamental Muslim legends of the nocturnal journey and of the ascension of the Prophet Muhammed appear in Dante's writings.

This is the first systematic study of networks of performance collaboration in the contemporary Chinese-speaking world and of their interactions with the artistic communities of the wider East Asian region. It investigates the aesthetics and politics of collaboration to propose a new transnational model for the analysis of Sinophone theatre cultures and to foreground the mobility and relationality of intercultural performance in East Asia. The research draws on extensive fieldwork, interviews with practitioners, and direct observation of performances, rehearsals, and festivals in Asia and Europe. It offers provocative close readings and discourse analysis of an extensive corpus of hitherto untapped sources, including unreleased video materials and unpublished scripts, production notes, and archival documentation.

Mick Wall penetrates the closed world of Aussie rock legends AC/DC. AC/DC moved to Britain from Sydney in 1975, and soon set up a residency at London's Marquee Club. Their short hair (including the odd mullet), loud rock and attitude chimed well with the lingering pub rock and soon-to-be punk crowd. They weren't really a band for guitar solos, and singer Bon Scott was the original bike-riding, speed-snorting, fighting man. An ex-convict he lived life fast and short; he died in February 1980, just before BACK IN BLACK, their huge-selling album, took off and the second period of AC/DC (with Brian Johnson as lead vocalist) was ushered in. BACK IN BLACK has gone on to sell 45 million copies worldwide, and as the band have become a global phenomenon so their reclusiveness has increased. Mick Wall, the don of heavy metal writing, seeks to penetrate the wall around the Young brothers, and write the first authoritative, in-depth critical account of AC/DC.

When your database application isn't running fast enough, troubleshooting is usually your first move. developers by an application developer who has learned by doing, this book shows you how to plan for performance as you would for any other application requirement.

Engaging and informative, this book provides students and researchers with a pragmatic, new perspective on the process of collecting survey data. By proposing a post-positivist, interviewee-centred approach, it improves the quality and impact of survey data by emphasising the interaction between interviewer and interviewee. Extending the conventional methodology with contributions from linguistics, anthropology, cognitive studies and ethnomethodology, Gobo and Mauceri analyse the answering process in structured interviews built around questionnaires. The following key areas are explored in detail: An historical overview of survey research The process of preparing the survey and designing data collection The methods of detecting bias and improving data quality The strategies for combining quantitative and qualitative approaches The survey within global and local contexts Incorporating the work of experts in interpersonal and intercultural relations, this book offers readers an intriguing critical perspective on survey research. Giampietro Gobo, Ph.D., is Professor of Methodology of Social Research and Evaluation Methods at the Department of Social and Political Studies - University of Milan. He has published over fifty articles in the areas of qualitative and quantitative methods. His books include *Doing Ethnography* (Sage 2008) and *Qualitative Research Practice* (Sage 2004, co-edited with C. Seale, J.F. Gubrium and D. Silverman). He is currently engaged in projects in the area of workplace studies. Sergio Mauceri, Ph.D., is Lecturer in Methodology of Social Sciences and teaches Quantitative and Qualitative Strategies of Social Research at the Department of Communication and Social Research - University of Rome 'La Sapienza'. He has published several books and articles on data quality in survey research, mixed strategies, ethnic prejudice, multicultural cohabitation, delay in the transition to adulthood, worker well-being in call centres and homophobia.

A serial killer holds New York in his grip. He does not choose his victims. Nor does he watch them die. But then there are too many of them for that. But which ones? And how many? A young female detective hiding her personal demons behind a tough appearance, and a former press photographer with a past he'd rather forget, and for which he still seeks forgiveness, are the only hope of stopping this psychopath. The writing has no great literary pretensions, but then it does not have to. The plot is the thing. Sunday Telegraph. Welcome to the second edition of *Avanti!* In the new edition our priorities remain the same as those of the first edition, to provide an introductory language course that meets the needs of both instructors and learners. Three significant characteristics set *Avanti!* apart from other first-year Italian texts: First, *Avanti!* satisfies students' desire to communicate in everyday situations right from the start and to explore Italy's rich and unique culture in meaningful ways. Second, *Avanti!* responds to instructors' concern that most textbooks attempt to cover too much material in the first year. We have designed an elementary course that reflects reasonable expectations for the amount of material that most beginning learners can acquire in one year of classroom instruction. Third, the methodology of *Avanti!* is firmly grounded in current

findings of research in second language acquisition and foreign language pedagogy. The materials provide support for instructors, particularly those with limited experience, whose goals are to teach mainly, if not exclusively, in Italian, and to create the student-centered, communicative classroom environment that is promoted by this research. The title *Avanti!* was chosen to convey the forward-thinking approach of this exciting new program.

This striking example of Malaguzzi's work and philosophy-in-practice has not previously been available to the scholarly community or to the public interested in the history of the Reggio Emilia educational experience. Its round-table discussions and dialogues reveal valuable insights into the ways young children can be encouraged towards cooperative learning experiences, with implications far beyond the particular curriculum at hand. The editors' commitment to progressive education and to the rights and potential of all children worldwide has led them to share this rich record of the experience, so that current readers and those yet to come can glimpse the brilliant minds at work during this era (1990), and as it were, "listen in" on the fascinating discussions that were held on the topic of "cooperation."

The theme of the conference this year was Critical CALL, drawing inspiration from the work carried out in the broader field of Critical Applied Linguistics. The term 'critical' has many possible interpretations, and as Pennycook (2001) outlines, has many concerns. It was from these that we decided on the conference theme, in particular the notion that we should question the assumptions that lie at the basis of our praxis, ideas that have become 'naturalized' and are not called into question. Over 200 presentations were delivered in 68 different sessions, both in English and Italian, on topics related specifically to the theme and also more general CALL topics. 94 of these were submitted as extended papers and appear in this volume of proceedings.

Is academic freedom threatened? The book examines current challenges to academic freedom in Europe, focusing mainly on Italy and Germany. The cases discussed demonstrate that research and teaching are under pressure in European democracies: in Hungary and Poland due to political constraints, in other countries due to societal expectations. Considering different interrelated aspects, the four parts of the book explore many real and potential threats to universities, scientific institutions and researchers, ranging from the European dimension of freedom of the arts and sciences to comparative analysis of emerging challenges to academic freedom against the backdrop of the COVID-19 pandemic. They highlight threats to university autonomy from the economic orientation of university governance, which emphasizes efficiency, competition, and external evaluation, and from new rules concerning trigger warnings, speech restrictions, and ethics commissions. Detailed study of these complex threats is intended to stimulate scholarly reflection and elicit serious discussion at European and national level. The volume contributes to the search for a new role of universities and scientific institutions and is addressed to academics and political stakeholders.

There is currently much discourse about generations in the public sphere. A sequence of letters conflates generations

and age cohorts born in the last few decades (generation “X”, “Y” or “Z”) as well as multiple categories are used to describe today’s young people as a generation that is distinct from its predecessors. Despite the popularity of generational labels in media, politics, or even academia, the use of generation as a conceptual tool in youth studies has been controversial.
