Formations of Modernity is a major introductory textbook offering an account of the important historical processes, institutions and ideas that have shaped the development of modern societies. This challenging and innovative book 'maps' the evolution of those distinctive forms of political, economic, social and cultural life which characterize modern societies, from their origins in early modern Europe to the nineteenth century. It examines the roots of modern knowledge and the birth of the social sciences in the Enlightenment, and analyses the impact on the emerging identity of 'the West' of its encounters through exploration, trade, conquest and colonization, with 'other civilizations'. Designed as an introduction to modern societies and modern sociological analyses, this book is of value to students on a wide variety of social science courses in universities and colleges and also to readers with no prior knowledge of sociology. Selected readings from a broad range of classical writers (Weber, Durkheim, Marx, Freud, Adam Smith, Montesquieu, Hobbes, Locke, Rousseau) and contemporary thinkers (Michael Mann, E.P. Thompson, Edward Said) are integrated in each chapter, together with student questions and exercises.

The past ten years have seen a rapidly growing interest in performing and recording Classical and Romantic music with period instruments; yet the relationship of composers' notation to performing practices during that period has received only sporadic attention from scholars, and many aspects of composers' intentions have remained uncertain. Brown here identifies areas in which musical notation conveyed rather different messages to the musicians for whom it was written than it does to modern performers, and seeks to look beyond the notation to understand how composers might have expected to hear their music realized in performance. There is ample evidence to demonstrate that, in many respects, the sound worlds in which Mozart, Beethoven, Wagner, and Brahms created their music were more radically different from ours than is generally assumed.

The main purpose of the book is to explore basic music theory so thoroughly that the interested student will then be able to easily pick up whatever further theory is wanted. Music history and the physics of sound are included to the extent that

they shed light on music theory. The main premise of this course is that a better understanding of where the basics come from will lead to better and faster comprehension of more complex ideas. It also helps to remember, however, that music theory is a bit like grammar. 'A delight to read' Philip Pullman 'Essential reading ... a genuine landmark publication' Tom Service A BBC Radio 4 'Book of the Week' The music of the British composer Michael Tippett - including the oratorio *A Child of Our Time*, five operas, and four symphonies - is among the most visionary of the twentieth century. But little has been written about his extraordinary life. In this long-awaited first biography, Oliver Soden weaves a century-spanning narrative of epic scope and penetrating insight. Soden has discovered troves of unpublished letters and manuscripts, and recorded moving interviews with Tippett's friends and colleagues. He paints a portrait of a powerful intellect and infectious personality: charming, stubborn, and great fun. But he also uncovers the sorrows and secrets that Tippett stowed away beneath his cheerfulness, not least the darker reaches of some tempestuous and often tragic love affairs. Soden's achievement is to have enriched our understanding not only of Tippett but of his times. Figures such as T.S. Eliot, E.M. Forster, Barbara Hepworth, and W.H. Auden jostle in the cast list. An Edwardian world of gaslight and empire cedes to turmoil and warfare; one startling revelation is the extent of Tippett's involvement in the fiery left-wing politics of the 1930s. The narrative roves from the mining villages of the north, blighted by unemployment, to a cell at Wormwood Scrubs, where Tippett was imprisoned as a conscientious objector. Later chapters uncover his operas' game-changing attitudes to gay and civil rights, against a backdrop of the Cold War and the Space Race. And singing from the page comes the music, through which Soden charts an exquisitely written course, offering lucid readings of Tippett's most famous works while resuscitating forgotten masterpieces. The result is a landmark in the study of twentieth-century culture, simultaneously an astonishing feat of scholarship and a story as enthralling as in any great novel.

ART MUSIC IN NIGERIA is the most comprehensive book on the works of modern Nigerian composers who have been influenced by European classical music. Relying on over 500 scores, archival materials and interviews with many Nigerian composers, the author traces the historical developments of this new idiom in Nigeria and provides a critical and detailed analysis of certain works. Written in a refreshing and lucid style and amply illustrated with music examples, the book represents a milestone in musicological research in Nigeria. Although written essentially for students and scholars of African music, this interesting

book will also be enjoyed by the général reader.

Provides an overview of the current research undertaken across the country, thereby providing a valuable resource for students, professors and research associates working in the arts disciplines, media studies, education, and cultural studies.

Inspired by true events, *Brainstorm* chronicles a handicapped family's struggle to overcome seemingly insurmountable odds. A story of personal transformation, it documents their life-and-death struggles and their ability to give so much when they have so little. Their plight is set in stark contrast to the materialism of contemporary society and the ridicule and social rejection they suffer as a result of their handicaps--short term memory loss and epilepsy. Garnet Dewitt has been having epileptic seizures for as long as he can remember--some so severe he wakes up in the hospital bruised and battered with no recollection of what happened. Finally, doctors are able to isolate the area of his brain responsible for the seizures. But during surgery, something goes terribly wrong and it's unclear if he will ever recover. In the meantime, his handicapped wife Ella, struggling with rejection and dwindling finances, has a terrible fall that lands her in hospital and doctors discover she has a brain tumor that must be operated on immediately. But, she slips into a coma and enters a dark and eerily surreal world. Debbie Dupree, a successful realtor and the epitome of a capitalist machine, is her only hope for survival. Debbie starts helping them to ease her guilty conscience just as her own life begins to unravel. But is she too late?
