

Shoot The Messenger A Reverse Harem Space Fantasy Messenger Chronicles Book 1

In this accessible collection, leading academic economists, psychologists and philosophers apply behavioural economic findings to practical policy concerns.

From TV personality and radio host Bill Flanagan comes a highly entertaining time-traveling adventure novel about how the past never gives up its hold on the present and how even sixty-five-year-olds are still kids at heart. If you had the chance to live your life over again, knowing everything that you know now, would you take it? Would you still take it if it meant losing everything you have today? Would a second chance to correct every mistake and missed opportunity be worth giving up the world you know and the life you have built? In *Fifty in Reverse*, fifteen-year-old Peter Wyatt does just that. In the spring of 1970, Harvard psychologist Terry Canyon is introduced to Peter, a quiet kid from a wealthy family who has been suspended from ninth grade for stripping off his clothes in Algebra class. When Terry asks Peter why he did it, the boy explains that he was trying to “shock myself awake.” It turns out that Peter believes he is a sixty-five-year-old man who went to sleep in his home in New York in the year 2020 and woke up in his childhood bedroom fifty years earlier. Hilariously depicting Peter’s attempts to fit in as a fifteen-year-old in 1970 and to cope with the tedium, foolishness, and sexual temptations of high school as he tries to retain the sense of himself as a sixty-five-year-old man, *Fifty in Reverse* is a thought-provoking and enlightening novel about second chances and appreciating the life you have today.

Stay in the light, avoid locked doors, and resist silver whispers. Meet Lynher Aris, hostess extraordinaire. By night, she entertains the Dark Ones passing through the Night Station: vampires, demons, shifters, and worse. By day, she undermines them all by working with the resistance to unravel their enslavement of the human race. But Lynher has a dark secret, and with the imminent arrival of Ghost—a vampire overlord few have seen but all fear—she must play her role as the queen of the Night Station to perfection, keeping the resistance and her secret safe, or risk losing everything, including the powerful Night Station itself. "A cross between *Innkeeper Chronicles* and *Vampire Chronicles*!" "Dark and sumptuous, the gothic urban fantasy we needed!"

INSTANT NEW YORK TIMES BESTSELLER A New York Times Editor’s Choice From journalist and New York Times bestselling author Charles Blow comes a powerful manifesto and call to action, "a must-read in the effort to dismantle deep-seated poisons of systemic racism and white supremacy" (San Francisco Chronicle). Race, as we have come to understand it, is a fiction; but, racism, as we have come to live it, is a fact. The point here is not to impose a new racial hierarchy, but to remove an existing one. After centuries of waiting for white majorities to overturn white supremacy, it seems to me that it has fallen to Black people to do it themselves. Acclaimed columnist and author Charles Blow never wanted to write a “race book.” But as violence against Black people—both physical and psychological—seemed only to increase in recent years, culminating in the historic pandemic and protests of the summer of 2020, he felt compelled to write a new story for Black Americans. He envisioned a succinct, counterintuitive, and impassioned corrective to the myths that have for too long governed our thinking about race and geography in America. Drawing on both political observations and personal experience as a Black son of the South, Charles set out to offer a call to action by which Black people can finally achieve equality, on their own terms. So what will it take to make lasting change when small steps have so frequently failed? It’s going to take an unprecedented shift in power. *The Devil You Know* is a groundbreaking manifesto, proposing nothing short of the most audacious power play by Black people in the history of this country. This book

is a grand exhortation to generations of a people, offering a road map to true and lasting freedom.

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

With new coauthor Leslie Gonzales, Russ Marion maintains the tradition of well-balanced, well-researched, and lively discussions of classic and contemporary leadership theories and their applications. The extensively revised Second Edition adds coverage of leader-member exchange theory, sensemaking, group conflict, and critical race and critical feminist perspectives, as well as a fuller treatment of transformational leadership. The authors begin with a brief look at the pros and cons of general entity- and collectivist-based approaches to leadership, reflecting key debates in the leadership literature. Next, readers encounter the history and applications of specific entity-based theories, followed by a discussion of conflict theory, which provides an apt transition to the exploration of collectivist ideas. The book finishes with coverage of critical theory, institutionalism, and population ecology theories that focus more on the organizational context for leadership than on leadership styles. Throughout this updated edition, the authors use metaphors and real-world examples from inside and outside educational contexts. Numerous figures, case studies, roundtable discussions, group activities, and reflective exercises engage readers and accelerate learning. Link Forward and Link Back sections reference upcoming or previous chapters to show that theories are dynamic. Leadership in Education, Second Edition, raises the bar for understanding and reinforcing practical applications of various theories in settings and situations that school administrators are likely to encounter.

A war hero and the recipient of the Congressional Medal of Honor, Sgt. Raymond Shaw is keeping a deadly secret—even from himself. Now he’s been returned to the United States with a covert mission: to kill a candidate running for US president . . . This “shocking, tense” and sharply satirical novel has become a modern classic, and was the basis for two film adaptations (San Francisco Chronicle).

In a wide-ranging and compelling account of the life of metrical and free verse in the twentieth century, poet and critic Jon Silkin deepens our understanding of the way poetry works on us. He begins from the premiss that two modes of verse, free and metrical, engage the creative energies of poetry now, creating a rich, fertile environment capable of yielding work valuable to poetry itself and to the society which has given it life. With a practitioner's empathy Silkin reads the poetry of Whitman, Hopkins, Eliot, Pound, Lawrence, Dylan Thomas, Bunting and eight British poets from the post-second World War period to illustrate how free and metrical verse create, separately or together, a poetic harmony. Additionally, he includes crucial statements on modern poetry

from poets themselves, concluding with a fine memoir of Basil Bunting by Connie Pickard, published in book-form for the first time. *Change the World by Changing One Meal a Day* Suzy Amis Cameron—environmental advocate, former actor, and mom of five—presents “a timely and empowering guide to take charge of your health—both for your own sake and for the planet’s” (Ariana Huffington) by swapping one meat- and dairy-based meal for a plant-based one every day. The research is clear that a plant-based diet is the healthiest diet on Earth. But what many people don’t realize is that nothing else we do comes close to the environmental impact of what we eat. Now Suzy Amis Cameron explains how we can boost energy, feel better, live healthier, and heal the Earth, starting with just one meal a day. Developed at MUSE School, the school she founded with her sister Rebecca Amis, Suzy’s program makes it possible for anyone and everyone to reverse climate change while they embrace a healthier lifestyle. This one simple step will begin to help you lose weight and stay naturally thin, reverse chronic health concerns, improve overall wellbeing, enjoy newfound energy, and slash your carbon footprint in half. Featuring fifty delicious, nourishing recipes and complete with inspiring success stories, shopping lists, meal plans, and pantry tips, *The OMD Plan* “is a book that nourishes our minds as well providing ways to nourish our bodies” (Jane Goodall).

Multiple sclerosis is a debilitating disease that has long been regarded almost beyond the possibility of successful treatment. For many patients a diagnosis of MS has meant the end of a normally functioning life. Not any longer. Celeste Pepe was a vigorous 42, a busy chiropractor and naturopath, when she got an MS diagnosis. What does an expert in alternative medicine do when she gets seriously ill? Dr. Pepe realized it was time to put her deep belief in alternative medicine to the test. She resolved to find and employ effective natural ways to reverse this condition and restore her health. She did, and her multiple sclerosis is now a thing of the past. Dr. Pepe's remarkable healing odyssey took her through many disciplines, theories, and practices in the world of natural medicine, and into the depths of her own body and mind. In the end, she distilled her successful treatment into a program that any MS patient can follow to restore health. She explains this with clarity, medical precision and a strong measure of encouragement. Using her own healing experience, Dr. Pepe explains the steps that can help the MS patient turn the corner on this disease: detailed nutrient testing and fortification, bee venom treatment, allergy testing and dietary changes, personally tailored nutritional plans, the use of specialized supplements, chelation therapy, regular exercise, and the replacement of mercury amalgam dental fillings. "I truly believe that if you diligently apply these healing protocols, which I have learned, you will no longer be known as an 'MS victim,'" says Dr. Pepe.

“Fascinating. Doidge’s book is a remarkable and hopeful portrait of the endless adaptability of the human brain.”—Oliver Sacks,

MD, author of *The Man Who Mistook His Wife for a Hat* What is neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this and more An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

For an increasing number of people, global warming is not an academic and scientific debate, but a matter of survival. As the planet warms at a rate of four degrees Fahrenheit per century, violent storms are increasing in frequency, icebergs are melting, sea level is rising, species are losing their habitats, and temperature records are being broken. *Feeling the Heat* consists of chapter-length visits by well-known authors to actual world "hot" spots, where people are already coping day-to-day with the consequences of climactic disruption. The locations for the book were strategically chosen because each represents a separate and important global warming impact, such as rising tides, melting glaciers, evolving ecosystems and air pollution. *Feeling the Heat* takes global warming out of the realm of armchair speculation and arcane scientific debate, revealing the process of climate change to be ongoing, serious and immediate.

Hiroshima is the story of six people--a clerk, a widowed seamstress, a physician, a Methodist minister, a young surgeon, and a German Catholic priest--who lived through the greatest single manmade disaster in history. In vivid and indelible prose, Pulitzer Prize-winner John Hersey traces the stories of these half-dozen individuals from 8:15 a.m. on August 6, 1945, when Hiroshima was destroyed by the first atomic bomb ever dropped on a city, through the hours and days that followed. Almost four decades after the original publication of this celebrated book, Hersey went back to Hiroshima in search of the people whose stories he had

told, and his account of what he discovered is now the eloquent and moving final chapter of Hiroshima.

Increasing numbers of parents grapple with children who are acting out without obvious reason. Revved up and irritable, many of these children are diagnosed with ADHD, bipolar illness, autism, or other disorders but don't respond well to treatment. They are then medicated, often with poor results and unwanted side effects. Based on emerging scientific research and extensive clinical experience, integrative child psychiatrist Dr. Victoria Dunckley has pioneered a four-week program to treat the frequent underlying cause, Electronic Screen Syndrome (ESS). Dr. Dunckley has found that everyday use of interactive screen devices — such as computers, video games, smartphones, and tablets — can easily overstimulate a child's nervous system, triggering a variety of stubborn symptoms. In contrast, she's discovered that a strict, extended electronic fast single-handedly improves mood, focus, sleep, and behavior, regardless of the child's diagnosis. It also reduces the need for medication and renders other treatments more effective. Offered now in this book, this simple intervention can produce a life-changing shift in brain function and help your child get back on track — all without cost or medication. While no one in today's connected world can completely shun electronic stimuli, Dr. Dunckley provides hope for parents who feel that their child has been misdiagnosed or inappropriately medicated, by presenting an alternative explanation for their child's difficulties and a concrete plan for treating them.
