"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Between 1994 and 1997, 18 former executives of American Honda Motor Company were convicted on federal fraud and racketeering charges. This true-crime story reveals the underbelly of one of the world's most respected companies, detailing the key characters in this 15-year scandal and their shady deals, along with internal and FBI investigations. Examines how the corruption adversely affected Honda's sales efforts, and analyzes the corporate culture that allowed it to flourish for so long. c. Book News Inc.

In today's multipolar world economy, strategic alignment is a key determinant of competitive advantage. Coca-Cola, Danone, Diageo, DuPont, Lufthansa and Tata are some of the companies that strive for a pragmatic approach to balancing competitive strategies with political and social obligations. *Aligning for Advantage* argues that to build and sustain corporate success, companies must synchronize business objectives and market positions with political and regulatory activism and social and environmental engagement. Moreover, to be credible and realizable, these external market and nonmarket strategies need to be equally attuned with corporate vision, values, and culture. The book advances a managerial process and conceptual framework for aligning corporate strategy. In some cases alignment may mean deep, strategically embedded partnerships with governments, NGOs, or other stakeholders. In others, alignment may take the form of looser, temporary collaborations with outside organizations. No matter the approach, the relationship between nonmarket and market strategies should be deliberate and genuine, not accidental or artificial. Truly aligned strategies should reconcile and modulate sometimes conflicting external demands in a way that is appropriate for the corporation's geographic and market positions. In the

end, companies must leverage their overall nonmarket strategy as a source of competitive advantage.

Over the last 10 years advances in the new field of neuromarketing have yielded a host of findings which defy common stereotypes about consumer behavior. Reason and emotions do not necessarily appear as opposing forces. Rather, they complement one another. Hence, it reveals that consumers utilize mental accounting processes different from those assumed in marketers' logical inferences when it comes to time, problems with rating and choosing, and in post-purchase evaluation. People are often guided by illusions not only when they perceive the outside world but also when planning their actions - and consumer behavior is no exception. Strengthening the control over their own desires and the ability to navigate the maze of data are crucial skills consumers can gain to benefit themselves, marketers and the public.

Understanding the mind of the consumer is the hardest task faced by business researchers. This book presents the first analytical perspective on the brain - and biometric studies which open a new frontier in market research.

Catalyst Deactivation 1994 was an expansion of earlier, highly successful symposia. The objective of the symposium was to promote a scientific approach of the phenomenon of catalyst deactivation which will contribute to the development of catalysts which are less subject to structural transformations and more resistant to poisons and coke formation. These aspects are dealt with in 12 plenary lectures, 48 oral presentations and 35 poster papers, which were critically selected from an impressive response from some 30 countries. Both fundamental and applied aspects were covered. The deactivation of catalysts in important industrial processes like fluid bed catalytic cracking hydrotreatment, hydrodesulfurization, catalytic reforming, hydrodenitrogenation, steam reforming, hydrodemetallization, hydrocracking, Fischer-Tropsch synthesis, propane dehydrogenation, phthalic anhydride synthesis received considerable attention. Mechanisms of poisoning, sintering and coking were further investigated and modelled and new experimental techniques for the characterization and the quantification of deactivation were also introduced.
