Katharine Susannah Prichard was born in 1883 to Australian parents then living in Fiji, but she grew up in Tasmania, lived for a while in both Melbourne and London before finally settling in Western Australia. She was one of the co-founders of the Communist Party of Australia in 1921, and her status as a communist and a female writer led to her being frequently under surveillance and harassment by the Australian police and other government authorities. She wrote *The Black Opal* in 1921, and the novel focuses on the very close-knit opal-mining community living and working on Fallen Star Ridge, a fictitious location set in New South Wales, Australia. Life is hard for the miners as their fortunes rise and fall with the amounts and quality of black opal they can uncover. Black opal is a beautiful mineral with fiery gleams of color, much valued for jewelry. Finding productive seams of such opal is a matter of both hard work and good luck. The novel is a well-drawn study of the relationships of the people living on the Ridge, and the two main characters are portrayed with clarity: Michael Brady, an older man much respected by the other miners for this knowledge and ethical approach, and Sophie Rouminof, a beautiful teenage girl who is the darling of the camp but who abruptly runs away to America after being disappointed in love. Despite the difficulties the individual miners face, there is a community spirit and an agreement on basic values and principles of behavior at the Ridge. But this community of shared endeavor is eventually jeopardized by the influence of outsiders, in particular an American who wishes to buy up the individual mines, operate them under a company structure, and simply pay the miners a salary. This conflict between capitalism and honest manual labour becomes one of the most important themes of the work. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

This repair manual covers Suzuki SV650 and SV650S 1999 to 2005.

"Gender: Psychological Perspectives" examines the behavior, biology, and social context in which both women and men function." "Research and scholarship form the basis of this book, providing the material for a critical review and an overall picture of gender from a psychological perspective. To accent the relevance of research findings in vivid detail, Brannon supplements the review of scholarly research with personal, narrative accounts of gender-relevant aspects of people's lives. Brannon also highlights the cross-cultural perspective of gender by including a section on diversity in each chapter, as well as weaving diversity issues throughout the text. Highlights of the Fifth Edition Includes more coverage of men and men's issues, striving for a better balance of women's and men's issues. New chapter organization moves the discussion of gender stereotypes to the third chapter to allow it to act as a framework for the book. Examination of implicit stereotyping also has been added. Includes more than 600 new references and 12 updated headline stories, as well as several new "According to the Media" and "According to the Research" boxes. Includes more research on ethnicity and cross-cultural issues, both in the "Considering Diversity" sections and throughout the chapters. Includes several studies on brain imaging, some that reveal gender differences and others that fail to do so.

PEM Fuel Cell Diagnostic Tools presents various tools for diagnosing PEM fuel cells and stacks, including in situ and ex situ diagnostic tools, electrochemical techniques, and physical/chemical methods. The text outlines the principles, experimental implementation, data processing, and application of each technique, along with its capabilities and weaknesses. The book covers many diagnostics employed in the characterization and determination of fuel cell performance. It discusses commonly used conventional tools, such as cyclic voltammetry, electrochemical impedance spectroscopy, scanning electron microscopy, and transmission electron microscopy. It also examines special tools developed specifically for PEM fuel cells, including transparent cells, cathode discharge, and current mapping, as well as recent advanced tools for diagnosis, such as magnetic resonance imaging and atomic force microscopy. For clarity, the book splits these diagnostic methodologies into two parts—in situ and ex situ. To better understand the tools, PEM fuel cell testing is also discussed. Each self-contained chapter provides cross-references to other chapters. Written by international scientists active in PEM fuel cell research, this volume incorporates state-of-the-art technical advances in PEM fuel cell diagnosis. The diagnostic tools presented help readers to understand the physical and chemical phenomena involved in PEM fuel cells.

This book investigates neoliberalism in education and explains how it is a complex phenomenon which takes on local characteristics in diverse geopolitical, economic and cultural settings, while retaining a core commitment in all its manifestations to market fundamentalism. Neoliberalism - that set of beliefs and practices which has become the economic orthodoxy of global preference since the 1980s - appears remarkably resilient despite the US financial crisis of 2008 and the subsequent implementation of austerity in the massively indebted nations of the European Union. This book addresses the phenomenon of neoliberalism in education and focuses on school and higher education settings in Ireland, the UK, Singapore and Hong Kong. Specifically, it addresses the role of language and semiosis in the reconfiguration of global educational practices along increasingly marketised lines. At the same time, the nature of the counter-hegemonic discourses also in circulation in these sectors is also considered. Collectively, the chapters in the book seek to shed light on the possibilities for resistance and the prospect of change from a variety of theoretical and (inter)cultural perspective. The chapters in this book were originally published in a special issue of the journal, *Language and Intercultural Communication*.

Winner of the 1997 James Laughlin Award of The Academy of American Poets In *Donkey Gospel*, his second collection of poems, Hoagland's generous effervescence and a jujitsu cleverness sparkle through line after line confronting negotiation and compromise, gender and culture, sex and rock music, sons and lovers, truth and beauty, and so forth. From the boy who speaks only in "Kung Fu" dialogue to the guy who visits a lesbian bar and sees his mother, this often funny and always thoughtful book of poems offers fresh, surprisingly frank meditations on the credentials for contemporary manhood.

Using an interdisciplinary perspective, this outstanding book provides an introduction to the theory and practice of reliability engineering. This revised edition contains a number of improvements: new material on quality-related methodologies, inclusion of spreadsheet solutions for certain examples, a more detailed treatment which ties the load-capacity approach to reliability to failure rate methodology; a new section dealing with safety hazards of products and equipment.

This book, This Has All Been Said Before, is myself welcoming the reader to my therapy. I used to suffer from depression and anxiety, now I enjoy every moment of it at least I do on the better days. This condition, this gift that I have come to understand that I have given to myself, has challenged me to have to fully realize and appreciate to my own satisfaction, who we are as I discovered in fact who I am. The meaning of life can be absolute or it can be subjective. Both matter. Life, in every single form matters, simply because in the absence of life expressing itself, there is nothing. Subjectively the meaning of life is whatever we as an individual attach to it, and it is from this perspective, the singular perspective each and every human provides God, that God has allowed God to completely 'know' God. Just as my depression was the gift I, my soul, has given myself, Phil Hammond, as the means through which I would view and explore creation this time in this space, God has given us to Godself, to do the same, explore creation on God's behalf. Thank you and I trust you will enjoy my explanation of everything.
